Art Unit: 2193

1. The abstract of the disclosure is objected to because superfluous language and legal phraseology are used in this paragraph (i.e., “[t]he invention concerns” and “comprise(s)”). Also, the Abstract contains the undefined acronym “FIR”. All such acronyms should be defined at the instance of their first use within the Abstract.

Correction is required. See MPEP § 608.01(b).

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

3. Claim 5 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim 5 is not been further treated on the merits.

4. Claim 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.

6. The following is an examiner's statement of reasons for allowance: the recorded references do NOT teach or suggest the digital filter having the detail interconnections

between a warped FIR filter, FIR filter and a delay features as recited in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
